FINE ART PRINTS

on Fine Art Photo Rag 310gsm

From ready to print files, output is exactly as supplied, files must be sized to the final print size required in RGB TIF format 300 dpi

16x12	16.50
20x16	20.50
20x24	25.50
20x30	31.00
36x24	36.99
40x24	40.99

To ensure the longevity of your prints we suggest that professional framing is carried out using acid free mount board and tape as soon as possible and we advise that you do not touch the surface of your prints as acids from the fingers could damage your prints.

Gicleé prints are generated from high resolution files or scans and printed with archival quality pigment inks onto various substrates including canvas, fine art and photo based papers.

The gicleé printing process provides better colour accuracy than other means of reproduction

FINE ART PRINTS
